Ashley Hu

Style Guidelines

1) Exdented bracing style should be used.

2) Braces without any content may be placed on the same line.

3) Each statement should be placed on a line on its own.

4) Each variable should be declared separately.

5) Variable and function names should use Camel Case conventions.

6) Class names should be capitalized.

7) C++ source files should use a ".cpp" extension and header files should use a ".h" extension.

8) Put "include" directives at the top of files.

9) Global variables should not be used.

10) Class data should be declared "private".

11) Provide names of parameters in function declarations.
